Is there enoch color contrast on this popup? If not, what should I change?

De afbeelding analyseren: gezichten kunnen wazig zijn om privacy te beschermen. The color contrast in your popup looks mostly good, especially with the white text on the black text on the white background. However, the secondary action button ("Minimale of use some improvement. The grey text on a light grey background might not be as readal."

To enhance the contrast, you could:

- 1. Darken the text on the secondary button to black or a darker shade of grey.
- Lighten the background of the secondary button to a lighter shade, or even white, to make the more.

Would you like any more specific suggestions or help with anything else?
