AI FOR THE BETTER

Dennie Declercq

MVP Developer Technologies
President & Developer DDSOFT

EUROPEAN CLOUD SUMMIT

MAINZ, GERMANY 26 – 28 SEPTEMBER 2022

Intro

About me

- Dennie Declercq
- @DennieDeclercq
- #DreamingIsBelieving
- President & Developer DDSOFT

Content

- Intro
- Intro to Accessibility
- Microsoft Cognitive & Applied AI Services For the Better
- Unsolved real world problems
- Futuristic examples
- This is already done before!
- AI for Good
- Outro

Intro to Accessibility

The Disability Spectrum

- Touch
 - One arm
 - Arm injury
 - New parent
- See
 - Blind
 - Low vision
 - Being distracted
- Hear
 - Deaf
 - Hard of hearing
 - Ear infection
- Speak
 - Non-verbal
 - Heavy accent
 - Mouth infection
- Cognition
 - Learning disability
 - Down syndrome
 - Memory difficulties
- Mental Health
 - Anxiety
 - Neurodiversity
 - Confused/ stressed (bad news)

What is a Learning Disability?

Significant limitations in both:

- Intellectual functioning
- Adaptive behavior

The two aspects of Learning Disability

Intellectual Functioning

Also called intelligence

Mental capacity

IQ score between 70-75

Adaptive Behavior

Conceptual Skills

- Language/literacy
- Money
- Time/numbers

Social Skills

- Social responsibility
- Self-esteem

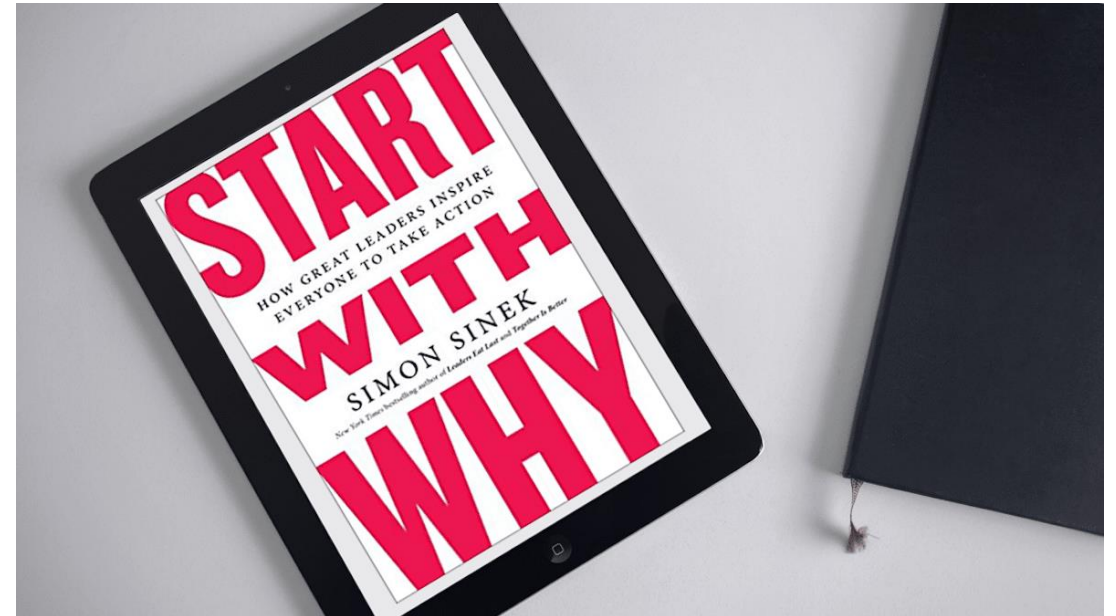

Practical skills

- Activities daily living
- Personal care / healthcare

Why do I care about people with Learning Disabilities?

- Left behind in Accessibility
- Personal introduction in 2012
- See the 'pains'

Why does Mental Health fit in Accessibility?

- Autism
- Anxiety
- Stressed
- Blocked (FFF)
- Triggers mental discomfort
- Decreases ability to think
- Decreases quality of daily living

An Inclusive World

- Same activities
- Same district
- Work Together
- Adjustments par person
- Safe environment
- Talent Focused
- Personal strength

The Focus of Today

Learning
disabilities

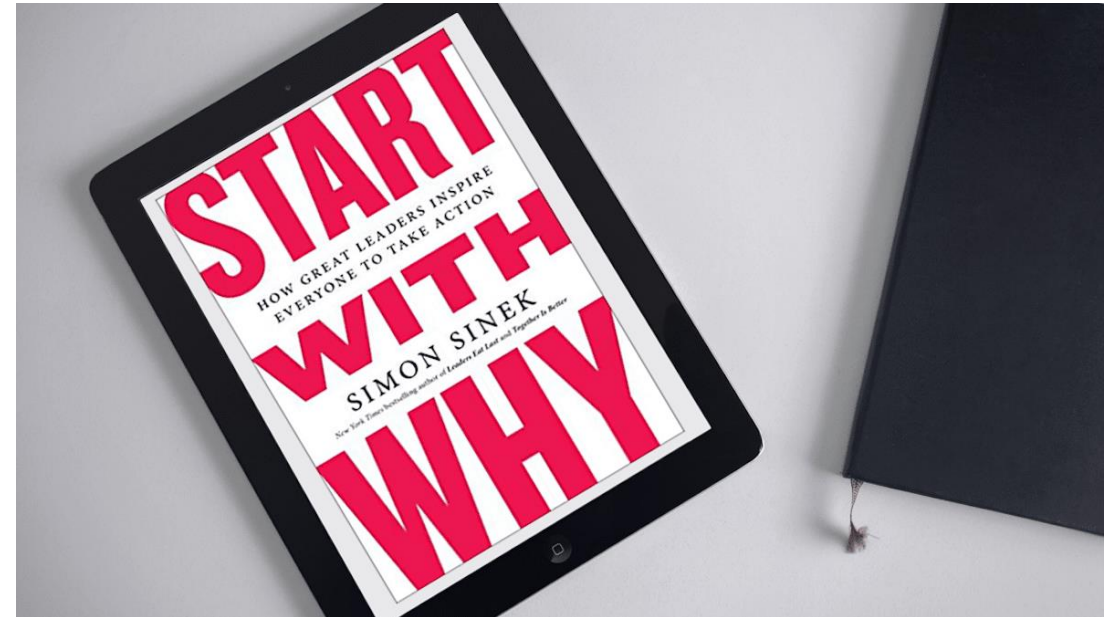

Autism

Mental Health

Why this focus?

- Too Less Focus from other accessibility companies/ initiatives
- My Knowledge
- My Motto
- My own field of connections

Microsoft Cognitive & Applied AI Services for the Better

What are Microsoft Cognitive Services?

- Microsoft Developer Focussed AI platform
- Easy to use API's
- Multiple language technologies (C#, JAVA, Python...)
- REST compatibility
- No AI or Mathematical knowledge needed
- Build in the Azure Suite
- Pay as you Go/ Pay by use
- Serverless
- Affordable

DEMO: EXPLORING COGNITIVE SERVICES

Immersive Reader

- Read aloud text
- Read aloud websites
- Linking pictographs to websites
- Text appearance options
- Colorize verbs/ nouns

Computer Vision

- Analyze Images
- Label Images
- Categorize Images
- Measures on Images

BOT Services

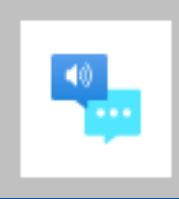

- Chatbots
- Q&A
- Knowledge sharing
- On Demand services
 - Without interrupting others
- Confidence

Language Understanding

- Analyze language
- Broader picture
- Custom words
- Wrong/ misspelled/ mispronunciation

Speech

- Text-To-Speech
- Custom Voice
- Voice Assistants

DEMO: SPEECH

Translator

- Translating
 - To reduce cognitive workload

DEMO: TRANSLATOR

And please... Mix & Match!

Unsolved Real World Problems

Literacy

- Difficulties with reading
- How do we translate governmental information?
- How do we provide information from shops/ leisure?
- Can we help with accessible communication?

Money

- How do we make digital money tangible?
- The pro's vs the con's of cashless
 - Pro
 - Sustainability
 - Limits diseases & infection
 - Con
 - Not tangible
 - Difficult concepts to learn
 - What about gifts from friends/ grandparents
 - What about a blocked bank account?

Daily Living

- Can we assist people with making daily choices?
- Can we help with purchases in the grocery store?
- Can we make temperature & humidity tangible?

Feelings & Emotions

- Can we train emotions?
- Can we describe emotions?
- What about a 'negative mood' alarm?
- Can we pop-in happy news on bad days?

Dependency

- Can we limit external dependency?
- Can we help to train people themselves?
- What about over protecting parents?
- Are there taboos?

AI can be the solution!

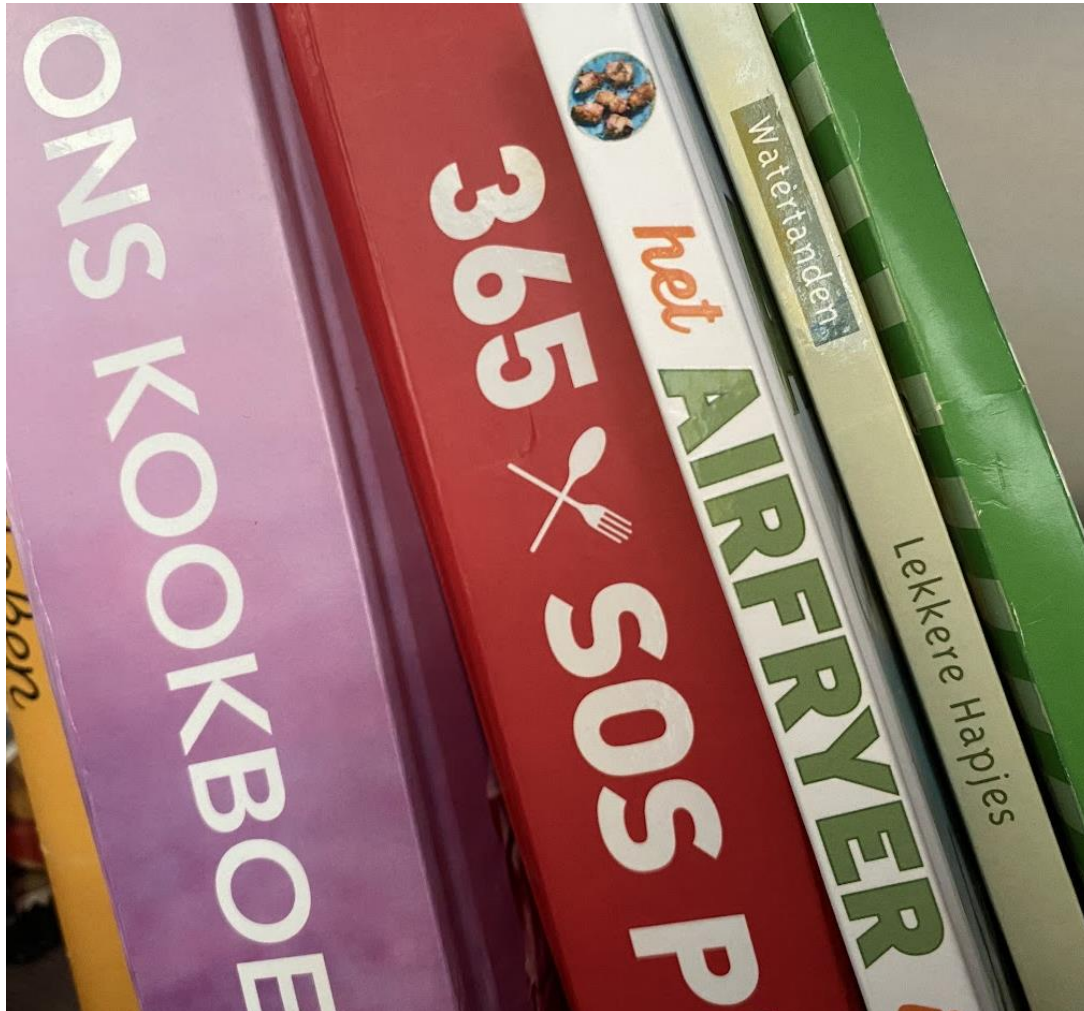

- Loads of solutions can be made with suggestions above
- Combined with existing AI tools (like Cognitive Services)
- It's just need to be build
- And the problems needs to be known!

Futuristic Examples

The Immersive Receptie

- Immersive Reader

My Vision Barber

- Custom Vision
- Face API

My Artificial Mom

- BOT Service
- Speech
- Custom Voice

My Smart Wardrobe

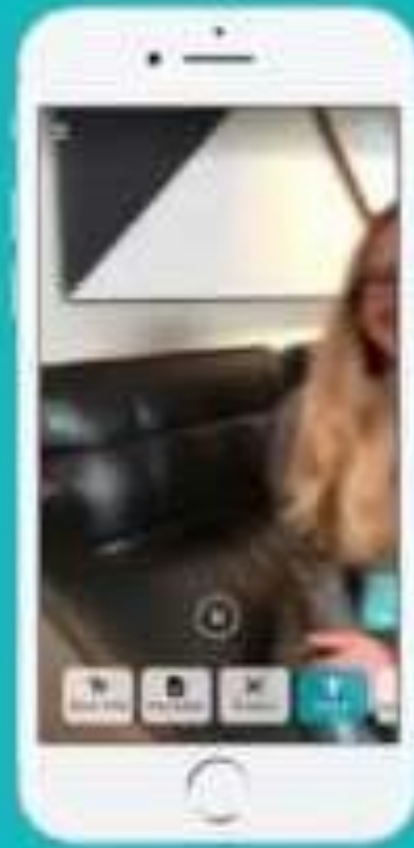

- Graph API
- Computer Vision
- Weather Forecasts

This is already done before!

Microsoft Seeing AI

Microsoft Translator

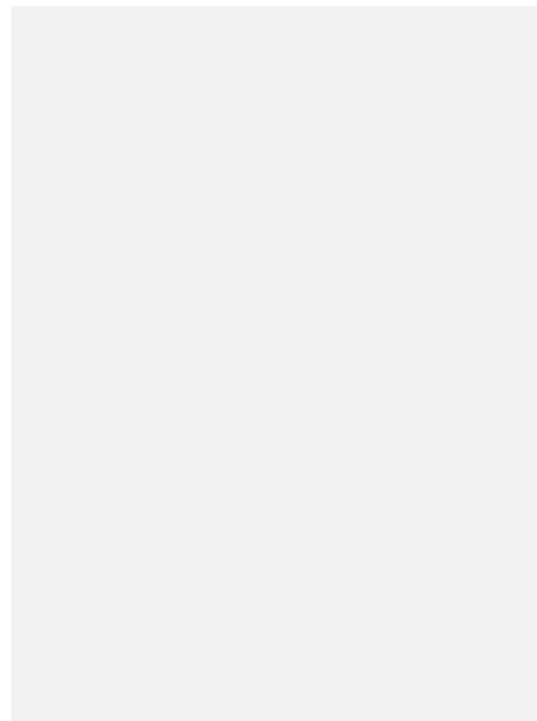

People can add
images or adjust
content as needed

AI for Good

CALL: AI for Accessibility

AI for Accessibility grants

Empower your work through grants, investments of technology, and expertise.

[Apply for a grant >](#)
