What is Accessibility & Inclusion

#ScottishSummit2022

What is Accessibility?

People with all needs can access:

- Internet
- Daily life activities
- All areas

Microsoft Inclusive Design

“

Inclusive Design is a methodology, born out of digital environments, that enables and draws on the full range of human diversity. Most importantly, this means including and learning from people with a range of perspectives. ”

Recognize Exclusion

Solve for one, extend to many

Learn from Diversity

<https://www.microsoft.com/design/inclusive/>

The Persona Spectrum

	Permanent	Temporary	Situational
Touch	One arm	Arm injury	New Parent
See	Blind	Cataract	Distracted driver
Hear	Deaf	Ear infection	Bartender
Speak	Non-verbal	Laryngitis	Heavy Accent

WCAG

“Web Content Accessibility Guidelines (WCAG) is developed through the W3C process in cooperation with individuals and organizations around the world, with a goal of providing a single shared standard for web content accessibility that meets the needs of individuals, organizations, and governments internationally.”

The POUR Principles

<https://www.w3.org/WAI/standards-guidelines/wcag/>

Testing Tools

The POUR Principles

#ScottishSummit2022

Perceivable, Operable, Understandable & Robust

- **Perceivable**: Can everyone **ACCESS** the content on the website?
- **Operable**: Can everyone **OPERATE** the website?
- **Understandable**: Can everyone **UNDERSTAND** the content on the website?
- **Robust**: Is your website robust? Is everything **working well** and fluid?

“While perceivable means that everyone can access the content with different tools, understandable means that everyone should be able to understand the content.”

Perceivable Blazor Apps

#ScottishSummit2022

Text alternatives for non-text

HTML

- Provide ALT text for Images

Blazor

- Include ALT descriptions in models

Content can be presented in different ways

HTML

- Use HTML 5 Standards
- Use a Modern UI Framework

Fonts & Clear Fonts

HTML

- Be sure that the text is big enough
- Use the standards

Color is not the only way conveying information

1

Use a (*) for error
Items

2

Show an
exclamation mark
when danger!

3

Use words as
delete / confirm
• Not only red / green

Resizable up to 400%

PROBLEM: Menu becomes invisible (standard Bootstrap template)

SOLUTION: Add 'Footer' menu

HTML

- Add 'Footer' in css file

Blazor

- FootNav components

Images are Resizable

HTML

- Use bigger images than CSS layout
- Resize with CSS

Demo Time!

Perceivable Blazor Apps

Operable Blazor Apps

#ScottishSummit2022

Functionality is available from a keyboard

HTML

- Use Headings
- Be aware of a good structure

Blazor

- Use `<EditForm> .. </EditForm>` for forms
- Be aware of the order of components!

Users have enough time to Read and Use the content

Blazor

- Avoid Timers
- When really needed: provide extend time

Content does not cause seizures and physical reactions

- People with epilepsy can have damages with strobe and light effects.
- People can have anxiety if content is moving too fast
- If you have flashy content:
 - Turn OFF by default
 - Provide a warning sentence before turning on

Users can easily navigate, find content and determine where they are

HTML

- Good HTML 5 usage
- Breadcrumbs

Users can use different input modalities beyond keyboard

HTML
5

- The web (& additional tools) does the most things for you

Demo Time!

Operable Blazor Apps

Understandable Blazor Apps

#ScottishSummit2022

Text is Readable and Understandable

- Use easy language
- Avoid jargon
- Be descriptive in error messages

Content appears and operates in Predictable ways

- Make good usage of HTML5 headings
- Be aware of wrong headings in standard Blazor components!

Users are helped to avoid and correct mistakes

- Make good usage of HTML5 headings
- Be aware of wrong headings in standard Blazor components!

Demo Time!

Understandable Blazor Apps

Robust Blazor Apps

#ScottishSummit2022

Content is compatible with current and future user's tools

- HTML 5
- Update often
- Update not too often

Demo Time!
