

“

The Power of Inclusion

HOW INCLUSION CAN HELP EVERYONE!

The Lightning edition!

”

2018 – Dennie Declercq

NDC { Oslo }

Who am I?

- ▶ Dennie Declercq
- ▶ Volunteer developer
- ▶ Representative and developer at DDSoft
- ▶ Inventor of #DreamingIsBelieving
- ▶ Positive thinker

And Inclusion worked for me!

- ✓ I can Live on myself in “De Bezaan”
- ✓ I can work in the days on my DDSOFT project and in Ithaka
- ✓ I can live near to, no stress
- ✓ I cook by myself
- ✓ I go out to parties and conferences as much as I want
- ✓ I clean my house
- ✓ If I need a talk, I have good friends!

As normal?

If I lived years ago the change was big that:

- I had to work in a special work, but live with stress
 - I had to live with my parents
 - I had to live in a cared environment
- With VERY LESS FREEDOM!!

2017 == #DreamingIsBelieving

NDC { Sydney }

“

Let me take you on the journey
of inclusion

”

The early days

- ▶ Taken away
- ▶ no place
- ▶ Clinics and specialized institutions.
- ▶ Have to change their life

The movement - Inclusion

- **Quality of life** (QoL) and **inclusion**. In short words, inclusion means: “people with a disability live and work together, in the same houses, the same environment as people without a disability, with **the needed adjustments par person**.”

Schalock's domains of wellbeing.

“To have quality of life, each of the following aspects must score as good for people with a disability as without.”

Figure 2: Quality of life domains

Interpersonal relations	Physical wellbeing	Self-determination	Social inclusion	Emotional wellbeing	Material wellbeing	Personal development	Rights
Affiliations	Health care	Choice	Natural supports	Safety	Ownership	Education and habilitation	Privacy
Affection	Mobility	Personal control	Integrated environments	Stable and predictable environments	Possessions	Purposive activities	Ownership
Friendships	Wellness	Decision	Participation	Positive feedback	Employment	Assistive technology	Due process
Intimacy	Nutrition	Personal goals	Barrier – free environments				
Interactions							

Source: Schalock, et al, 2002.

Van Gennep

- ▶ You can fill in your life yourself with your own normal, and special needs
- ▶ You can live, and do the same things as persons without a disability
- ▶ You are happy with the life you have

What inclusion really means

Real Inclusion

- Same activities;
- Same district;
- Work Together;

Not so real Inclusion

- A hostage for people with a disability.
- A school for kids with a disability.
- A working house specific for people with a disability.

A way beyond diversion

“ DIVERSITY is being invited to the party. INCLUSION is being asked to dance.”

-Vernā Myers

Not just integration

Inclusion

Exclusion

Segregation

Integration

From caring to coaching

Caring

- Big institutions, clinics;
- Professionals care people with disability;
- “what is normal?”;
- Many rules;
- No in-between;
- Big “you must take it all” packages;
- Top – down;

Coaching

- Small organizations;
- Professional coaches the client;
- “what want’s the client?”;
- Less rules;
- A big “in between” zone;
- Professional next to client;

“

Inclusive software and apps

”

“If you want to create an inclusive environment, where people can live their own life, technology helps the people to find their way.”

Special apps and software, made for people with special needs can open many doors. You can give the world, packed in a simple software package.

Basic rules:

- ▶ Simplify the layout
- ▶ Color by function
- ▶ Use as many pictures or pictographs as possible
- ▶ Add Text To Speech (TTS)
- ▶ Structured apps

Simplify the layout

- ▶ **Less** content per screen
- ▶ **Logical** content per screen
- ▶ **Light** or white **background**
- ▶ A few **accent** colors

Color by function

I can speak !

I can navigate !

I open an other page!

Pictures and pictographs

► What means the following?

► **Kip**

► The answer is:

For some people with a disability, who cannot read, Letters and words means nothing.

An other language for us. Everybody (except people with visual impairments) can see a picture.

Text To Speech

- ▶ In English for each mobile OS
- ▶ Windows 10 UWP Desktop

Structured apps

- ▶ Different screens 'views' different content
- ▶ Frameworks aren't helpful for people with disabilities

Digital Difficulties for p.w.d.

- ▶ Difficulties are different **par disability**
- ▶ Most helping apps are made **par disability**

Intellectual Disability

- ▶ Difficulty to:
 - ▶ Read
 - ▶ Understand

Autism

- ▶ Difficulty to:
 - ▶ Understand
 - ▶ See structure

Blindness or vision loss

- ▶ Decreased ability to read
- ▶ Decreased ability to navigate

Think inclusive!

- ▶ Do **measure** how many functions needed
- ▶ What information lives with the people.
- ▶ Maybe they want to find their way to the bakery, pizza hut?
- ▶ Apps to **assist** brushing tooth and washing yourself, clothing....
- ▶ Software does matter!
- ▶ Software really helps inclusion.

Innovative software examples

Cloudina

Grid 3

Eten (Food)

WOENSDAG 22 MAART 2017

CHAMPIGNONSOEP, STOOFVLEES MET SLA
EN FRUIT. IES. FRUIT

INSTELLINGEN

Why does software helps inclusion?

- ▶ Trust
- ▶ ICE
- ▶ Access to info
- ▶ More independency

Which apps and software do I use?

- For me, following apps and software are very helpful

These apps helping me a lot in my daily life!
All of them I use on a daily base

Which apps are missing?

- ▶ Selfcare
- ▶ Wellbeing
- ▶ Navigating
- ▶ Clothing
- ▶ Hygiene
- ▶ Housekeeping
- ▶ Psychological wellbeing

Pricing

- ▶ Less budget
- ▶ Keep it cheap
- ▶ A free side project?

You can learn
from people
with disabilities

A PEEK AT THE OTHER SIDE

People with autism at work

- ▶ People with autism are mostly:
- ✓ Honest
- ✓ Work good with rules
- ✓ Have a nice planning
- ✓ Are loving structure
- ✓ Direct
- ✓ Very specialized

Nothing is such logical as autism.

Developers logic

- A value is true or false
- It's good to declare variables, what type it's expect
- If you program a loop, the exit scenario is mostly clear
- It's very structured

Autistic logic

- ✓ A fact is only true or false
- ✓ It's very nice that every circumstance is declared
- ✓ If there's a path to follow, auti's like it's clear and clean
- ✓ Most of them are very structured
